SAP MANAGED TAGS

SAP S/4HANA

1. Enterprise Structure Tables

Table Short Name Description & Usage

VKORG	Sales Organization	Defines top-level selling unit. Links to Company Code (BUKRS). Controls pricing, document types.
TVKOV	Distribution Channel	How products reach customers: Direct, Wholesale, Retail. Assigned to Sales Org.
TVTA	Sales Area	Combination of Sales Org + Distribution Channel + Division. Core SD entity.
T001W	Plant	Manufacturing/storage location. Linked to Company Code. Used in availability check.
TVST	Shipping Point	Physical dispatch point. Determined automatically based on loading group, shipping condition, plant.
T001	Company Code	FI organizational unit. All SD transactions ultimately post to a Company Code.
TVSB	Shipping Condition	Controls automatic shipping point determination. Maintained in customer master.
TVGR	Transportation Group	Groups materials for route determination. Maintained in material master.
T024E	Purchasing Org	Used in inter-company and third-party sales scenarios for purchase orders.

2. Customer Master Tables (KNA1 / Business Partner)

Table Short Name Description & Usage

KNA1	General Data	Name, address, language, country, tax number. Created once per client.
KNB1	Company Code Data	Reconciliation account, payment terms, dunning area. One record per company code.
KNVV	Sales Area Data	Sales office, group, shipping condition, pricing procedure, customer stats group.
KNVP	Partner Functions	SP (Sold-to), SH (Ship-to), BP (Bill-to), PY (Payer). Controls document partners.
KNVS	Shipping Data	Shipping conditions, delivery priority, max partial deliveries, order combination.
KNVD	Customer Material Info	Customer-specific material numbers, delivery plant, loading group, units of measure.
KNVK	Contact Persons	Contact details per customer: name, department, phone, email.
KNEX	Legal Control	Export/import license data for foreign trade compliance.
BUT000	Business Partner	S/4HANA: Central BP master record. Replaces KNA1/LFA1. Role-based data management.
BUT100	BP Roles	Business Partner roles: FLCU00 (customer), FLVN00 (vendor). Role assignment table.

3. Material Master Tables – SD Relevant Views

Table Short Name Description & Usage

MARA	General Data	Material number, material type (MTART), division, basic UoM, weight, dimensions.
MAKT	Material Description	Short text per language. Used in order line items, invoices, output forms.
MVKE	Sales Org Data 1&2	Item category group (MTPOS), sales unit, minimum order qty, delivery plant, tax data.
MARC	Plant Data / MRP	MRP type, lot size, procurement type, availability check rule (MTVFP), lead times.
MARD	Storage Location Stock	Unrestricted, quality inspection, blocked stock per storage location.
MLAN	Tax Classification	Tax classification per country/tax category. Used in pricing condition MWST.
MVKGR	Material Group	Used for pricing access sequences and statistics grouping.
MARM	Units of Measure	All alternative UoMs with conversion factors (e.g., EA, KG, PAL, CTN).
MBEW	Material Valuation	Standard price, moving average price. Used for COGS posting at goods issue.
MLGN	Warehouse Mgmt Data	WM storage type, bulk storage indicator. Required for WM picking in delivery.

4. Sales Document Tables (Order Header, Item, Schedule Lines)

Table Short Name Description & Usage

VBPA	Sales Order Header	Document number, sales area, document type, created by, date, pricing date, customer.
VBAP	Sales Order Item	Material, quantity, UoM, plant, item category, pricing data, schedule line data.
VBEP	Schedule Lines	Confirmed quantity, delivery date, MRP relevance, movement type, schedule line cat.
VBKD	Business Data	Payment terms, incoterms, purchase order number. Per header and item level.
VBPA	Partners	All partner functions (SP, SH, BP, PY, LS, WE, RE) for header and item.
VBFA	Document Flow	Links all related documents: inquiry → quotation → order → delivery → billing. Key for tracing.
VBUK	Header Status	Overall delivery status, billing status, rejection status, credit status at header.
VBUP	Item Status	Delivery status, billing status, goods movement status at item level.
VBPA-BSTNK	PO Reference	Customer's purchase order number. Used for invoice matching and SOX compliance.
VAKPA	Address Data	Ship-to address override per sales order item. One-time customer address.

5. Delivery & Shipment Tables

Table Short Name Description & Usage

LIKP	Delivery Header	Delivery number, delivery type (LF/NL/LR), ship-to party, shipping point, planned GI date.
LIPS	Delivery Item	Material, delivery qty, plant, storage location, batch, serial numbers, item category.
LIDS	Delivery Item Detail	Packing data, handling unit assignment, dangerous goods classification.
VTTK	Shipment Header	Shipment number, carrier, route, transportation planning point, forwarding agent.
VTPP	Shipment Items	Deliveries included in shipment. Links LIKP to VTTK.
VEKP	Handling Unit Header	Packing material, gross weight, volume, sealing number, tracking number.
VEPO	HU Item	Contents of each handling unit. Links to delivery item LIPS.
NSDM_V_TC	Transport Connection	Last-mile delivery tracking data. Used with track-and-trace solutions.
EKKO	PO Header (3rd Party)	Purchase order created automatically for third-party (item cat TAS) scenarios.
EKPO	PO Item (3rd Party)	PO line item with material, qty, vendor. Linked to sales order via VBAP-AUFNR.

6. Billing & Accounting Tables

Table Short Name Description & Usage

VBK	Billing Header	Billing document number, billing type (F2/RE/G2), payer, billing date, net value.
VBAP	Billing Item	Material, billed qty, net price, tax amount, revenue account, cost. Links to VBAP.
VBSS	SD Collect. Run	Billing due list run data. VF04 collective billing processing log.
BKPF	Accounting Header	FI document created from billing. Company code, posting date, document type RV.
BSEG	Accounting Line Items	Debit/credit postings: customer AR, revenue G/L, tax G/L, freight G/L.
VBREVE	Revenue Recognition	Revenue distribution schedule for multi-period billing plan items.
KONA	Rebate Agreements	Rebate agreement number, validity, rebate recipient, condition type (BO01-BO05).
KONH	Condition Header	Header data for pricing conditions. Validity dates, scales, release status.
KONV	Conditions (Doc)	All condition values in a sales/billing document. Pricing trace source table.
KOND	Conditions (Master)	Condition records per condition type. Accessed via VK13/VK11. Price master data.

7. Pricing & Condition Tables

Table Short Name Description & Usage

A304	Material Price (PR00)	Condition table for price per sales org, distribution channel, material.
A305	Price List (PR00)	Price list type-based pricing. Customer price list assigned in customer master.
A306	Customer-Material	Condition table for customer-specific material pricing records.
T685	Condition Types	All condition types: PR00, K007, RA01, KF00, MWST, HD00. Controls calculation.
T682	Access Sequences	Access sequence tables. Defines search order for finding condition records.
T683	Pricing Procedures	Pricing procedure definition. Steps, conditions, from/to, requirements, alt calc.
T683S	Pricing Procedure Det.	Pricing procedure determination: sales area + doc pricing procedure + cust PP.
T681	Condition Tables	All condition table definitions. Each table defines key fields for conditions.
PRCD_ELEMENTS	New Pricing (S/4)	S/4HANA 1909+: Replaces KONV. New pricing element table in universal journal.
T006	Units of Measure	UoM master table. ISO codes, decimal places. Used in pricing scale unit.

8. Output Determination Tables (NACE)

Table Short Name Description & Usage

NAST	Message Status	Output records for all SD documents. Processed/unprocessed, medium, printer, time.
T685A	Output Types	All output types: BA00, RD00, LD00, RD03. Controls transmission medium, partner.
TNAPR	Processing Programs	Print program, form name (SmartForm/Adobe), routine assigned to output type.
VNAST	Message Log (Del.)	Output records specifically for delivery documents.
VBDKR	Doc Output (Billing)	Billing output records. Invoice print, email, EDI transmission status.
T166	Output Cond. Tables	Condition tables for output determination (analogous to pricing cond. tables).
TOASP	Archiving Links	Document links for archived output (optical archiving / SAP DMS integration).

9. Credit Management Tables

Table Short Name Description & Usage

KNKK	Credit Control Data	Credit limit, credit exposure, risk category, credit control area per customer.
CNCREDITACCOUNT	Credit Account	S/4HANA credit management: credit account replacing KNKK. FIN-FSCM-CR.
T014	Credit Control Areas	Defines credit control area master data. Assignment to company codes.
VBUK-CMGST	Credit Status	Credit hold status on sales document header (A=not checked, B=OK, C=held, D=released).
KKBER	Credit Check Log	Log of automatic credit checks. Timestamp, result, credit exposure at check time.
FD32	Credit Master (T-Code)	Transaction to maintain credit limit, risk category, payment history for customer.

10. Availability Check (ATP) & MRP Tables

Table Short Name Description & Usage

MARC-MTVFP	Avail Check Rule	Availability checking rule (01, 02, CH). Controls what stocks/receipts are considered.
------------	------------------	--

11. Partner Functions Tables

Table Short Name Description & Usage

VBPA	Document Partners	All partner functions per document: SP, SH, BP, PY, LS (carrier), WE (goods recip).
TPAR	Partner Functions	Master list of all partner function codes and descriptions.
TPABT	Partner Procedure Det.	Determination of partner functions from customer master to sales documents.
KNVP	Customer Partners	Partner functions maintained in customer master. Source for default document partners.
T180	Account Groups	Customer account groups (SOLD, SHIP, BILL, PAYR). Controls field selection in BP.

12. Customer-Material Info & Condition Records

Table Short Name Description & Usage

KNVD	Customer-Mat. Info	VD51: Customer-specific delivery and shipping data per material. Source: customer orders.
MVKE	Material Sales Views	Item category group (MTPOS_MARA), sales unit, min. order qty, delivery plant.
MLAN	Tax Data	Tax classification per departure country and material. Used in tax condition MWST.
A502	Cust/Mat Conditions	Price conditions specific to customer-material combination. Accessed via VK13.

13. Document Types & Configuration Tables

Table Short Name Description & Usage

TVAK	Sales Doc Types	OR, CS, RO, SO, QT, KA, DR, CR and all custom types. Controls number ranges, screens.
TVAP	Item Categories	TAN, TANN, TAB, TAD, TAX, TATX, RENN. Controls pricing, delivery relevance, billing.
TVEP	Schedule Line Cat.	CP, CB, LS, BN. Controls movement type, MRP relevance, transfer of requirements.
TVLK	Delivery Types	LF (outbound), NL (replenishment), LR (returns), NLCC (cross-company). Controls Gl.
TVFK	Billing Doc Types	F2 (invoice), RE (returns), G2 (credit), L2 (debit), F5 (proforma), IV (inter-co.).
TVLSP	Shipping Points	Shipping point master with address, calendar, factory calendar assignment.
T173	Item Cat Groups	Material item category groups: NORM, BANS, ERLA, LUMF, DIEN, LEIH for BOM/service.

14. Text Determination Tables

Table Short Name Description & Usage

STXH	Text Header	Text object, text ID, language, key. Master table for all SAP long texts.
STXL	Text Lines	Actual text content in compressed format. Linked to STXH. Use READ_TEXT to access.
TTXID	Text IDs	Text type definitions per text object (VBBK for order header, VBBP for order item).
TTXOB	Text Objects	Text objects: VBBK (order), VBBP (item), VDKK (delivery), VBRK (billing).

15. Rebates & Settlement Tables

Table Short Name Description & Usage

KONA	Rebate Agreements	Rebate agreement: validity, recipient, accrual rate, settlement calendar.
KNUMA_PI	Condition No (Reb)	Rebate condition record number. Links rebate agreement to condition type.
VBOF	Rebate Basis	Billing documents forming the basis for rebate accruals. Updated with each invoice.
VBOX	Rebate Billing	Settlement billing documents (credit memos) for final rebate settlement.

Pro Tips for Using SAP SD Tables

- Use **SE16N** to directly query any table with filters — faster than SE16 for large tables.
- **VBFA** (Document Flow) is the most powerful tracing tool — enter any SD document number to see the complete chain.
- **KONV** stores runtime pricing conditions from documents; **KONH/KOND** store master condition records.
- In S/4HANA, **BSEG** is replaced by **ACDOCA** (Universal Journal) — always check the migration note for your release.
- Use **ST05** (SQL Trace) to discover which tables are being read during a transaction — great for performance tuning.
- **PRCD_ELEMENTS** replaces **KONV** in S/4HANA 1909+. For older systems, KONV is your pricing debug table.
- Always combine **VBAK + VBAP + VBEP** for complete sales order data — never query just one of them alone.
